JUN-AIR®

oil-less compressors

The JUN-AIR *i*Series is the logical choice wherever an efficient yet economical oil-less compressor is required.

These compressors represent the complete compressed-air package, with a rocking piston compressor and air receiver.

The series deliver a sturdy and compact design. The compressors have been constructed with fewer moving parts in order to reduce wear and provide maximum reliability and minimum maintenance.

” require no installation and minimal maintenance

All components are manufactured to a high specification. The receivers are internally powder-coated in order to avoid corrosion and to ensure optimum air quality throughout the compressor's lifetime.

The fully automatic compressors are ready to operate straight from the box. They can be placed directly in the area where air is required and they are ideally suited for multiple applications.

Features:

- Flexible design
- Manual Drain
- Oil free air
- Continuous operation
- Easy maintenance
- Supplied with a 2 year warranty

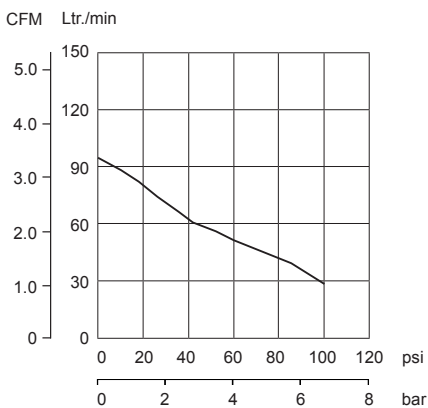

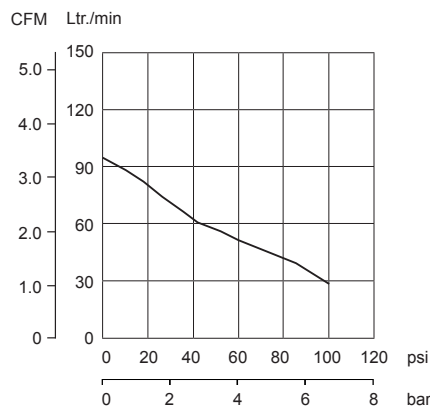

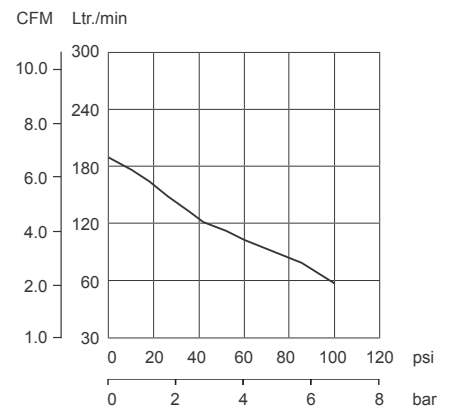

The *i*Series uphold decades of JUN-AIR tradition.

Performance, design and usability have traditionally been the cornerstones in our design process.

At the same time we maintain that, concern for the environment, low energy consumption, minimum maintenance and versatility will always be essential ingredients in any JUN-AIR product.
